Strategy Notes

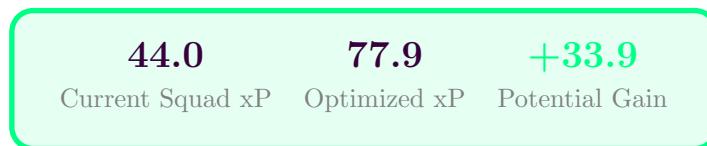

This Wildcard draft prioritizes **season-balanced** selection:

- Players chosen based on long-term metrics (PPG, total points, minutes)
- Cheap bench strategy to maximize starting XI quality
- Fixtures are considered but don't dominate selection
- All players are currently available (no injuries/susensions)

Note: This is a suggested squad based on current data. Always verify player availability and news before activating your Wildcard.

Beat The League Analysis

Template Picks (High League Ownership)

These players are highly owned in your league - keeping them protects against losing ground:

- B.Fernandes (MID) - 75% league ownership
- Haaland (FWD) - 75% league ownership
- Foden (MID) - 50% league ownership

Differentials (Low League Ownership)

These players give you upside vs your league rivals:

- Pickford (GKP) - only 0% league ownership
- Rúben (DEF) - only 0% league ownership
- Tarkowski (DEF) - only 0% league ownership
- Rogers (MID) - only 0% league ownership
- Calvert-Lewin (FWD) - only 0% league ownership

Strategy Notes

This Free Hit draft uses **Balanced** strategy:

Strong template core with 2-4 differentials for upside potential.

Key considerations:

- Players selected based on **ep_next** (expected points next GW)
- League ownership used to identify differentials and template picks
- Formation optimized for maximum expected points
- All players are currently available (no injuries/susensions)

Note: Verify player availability and news before activating your Free Hit chip.

Chip Usage Strategy

Current Chip Status

Wildcard	Free Hit	Bench Boost	Triple Captain
Available	Available	Available	Available

Season Position: First Half (GW1-19) — **Chips Remaining:** 4/4

Strategic Chip Planning

The 2025-26 season features two sets of chips - one for each half (GW1-19 and GW20-38). Unused chips from the first half do NOT carry over, so plan accordingly.

Wildcard Strategy

- **First Half (GW7-9):** Use around fixture swings when multiple premium players need replacing
- **Second Half (GW30-32):** Prepare for late-season Double Gameweeks and navigate rotation
- **Key Trigger:** When 4+ transfers are needed or major template shift occurs

Free Hit Strategy

- **Target:** Blank Gameweeks when your team has 6+ players without fixtures
- **Alternative:** Use during a favorable DGW if Bench Boost is already used
- **Avoid:** Using too early - save for fixture congestion in spring

Bench Boost Strategy

- **Ideal Setup:** All 15 players have double fixtures in a DGW
- **Preparation:** Build bench value 2-3 weeks before target DGW
- **Target GWs:** Historically GW34-37 has best DGW opportunities
- **Minimum:** At least 13 players with doubles for optimal value

Triple Captain Strategy

- **Primary Target:** Premium attacker (Haaland, Salah) in a DGW with 2 easy fixtures
- **Form Check:** Player should be in top form with consistent returns
- **Fixture Analysis:** Both DGW opponents should be FDR 2-3 (favorable)
- **Avoid:** Using on single GW unless truly exceptional fixture

Recommended Timing

Based on GW16 - showing only available chips.

Chip	Target GW	Reasoning
Wildcard 1	Before GW20	Use soon - does not carry over!
Free Hit 1	Next BGW	Team gaps during blanks
Bench Boost	DGW34-37	Maximum doubles opportunity
Triple Captain	Next DGW	Premium player with 2 easy fixtures

Blank & Double Gameweek Calendar

No confirmed BGW/DGW detected yet for remaining gameweeks.

Season Insights

Key Observations

Based on your squad's actual performance data:

- **Top performer:** Haaland (151 pts)
- **Declining form:** Virgil - consider monitoring
- **xG overperformer:** Van de Ven (+1.0) - regression risk

Projected Performance

Projection based on 16 gameweeks played at 51.2 PPG average.

Key Insights

- Gap Analysis:** Study the points gap per gameweek to identify where elite managers gain.
- Chip Strategy:** Top managers often save chips for BGW/DGW opportunities.
- Captain Picks:** Elite players typically captain high-ceiling options.
- Transfer Discipline:** The best managers minimize transfer hits—quality over quantity.
